DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 9-12, 17-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokoyama et al 5857726.

Re **Claims 1-4, 9-12, 19, 23, 24**, Yokoyama discloses instrument bezel 20 for a vehicle comprising

body 21 configured to surround a window (inherent) of instrumt cluster assy 20,
including integrally-formed various body portions (inherent), and,
the cluster assy including a speedometer (Col 4, lines 49-50).

Re **Claims 17, 18, 20-22**, the patent also discloses a method of adding an add'l instrument to the vehicle, comprising replacement of an instrumt bezel, the steps derived from the structure and means described above.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8, 13-16, 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yokoyama in view of Sano et al 5324203.

Yokoyama does not disclose additional instrument mounts on various portions of the body, while Sano shows this configuration in body 2b in Fig 1. It would have been obvious to one with ordinary skill in the art at the time the invention was made to include additional instrument mounts on the bezel for various meters/gauges for increased visual convenience and safety of the driver.

3. The prior art made of record and not relied upon is considered pertinent to the applicant's disclosure, in addition to the art listed on the IDS filed 2/21/01: Gronowicz et al 6048020, Nishijima et al 5979965, 5685595, Kelman et al 5823602.
